muselook

Pick any idol makeup look. See it translated to your skin tone, on your face, with the K-beauty products that match.

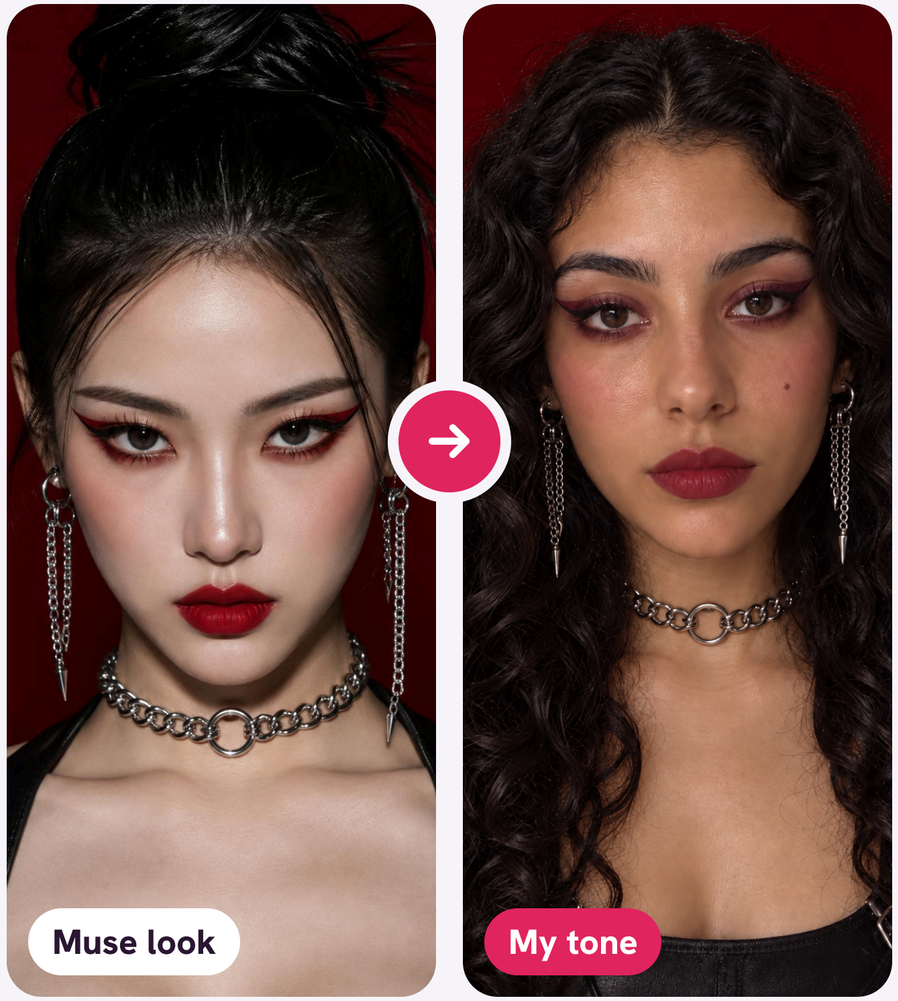

FOR

US Gen Z K-beauty fans (13+), especially medium-to-deep skin tones.

PROBLEM

Idol product lists ignore skin tone. Fans can't swatch from overseas, and K-beauty shade ranges skew light, so they buy shades that look wrong on them.

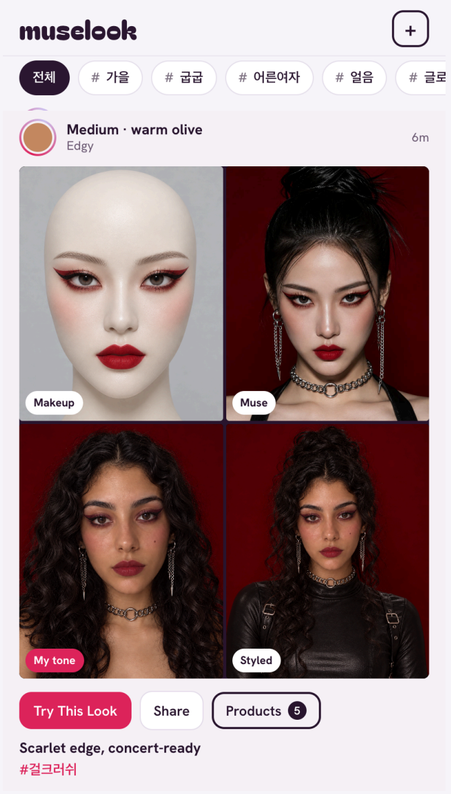

"Brown skin foundations: Tirtir is the only option" (r/koreanskincare, 2025) · US is K-beauty's #1 export market, $2.19B in 2025, +15.1% (MFDS via Yonhap)

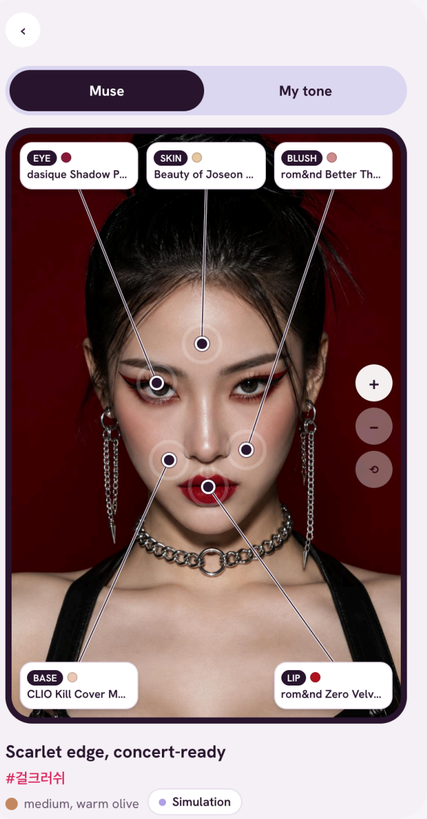

Base re-picked for medium olive skin: CLIO 02 → TIRTIR 35N

HOW CLAUDE DOES THE WORK

1. **Claude Haiku 5.5** reads the look photo: color, texture and technique for each face area, plus trend tags.
2. **Claude Sonnet 5.5** reads your skin tone and re-picks every shade, with a reason for each change.
3. A **Claude Sonnet 5.5 agent** web-searches K-beauty products for each shade and returns buy links.
4. An image model paints the look on your selfie. Face pins come from in-browser landmarks.

muselook.fly.dev

Live: Claude analysis, tone translation and product search on every upload. **Sample:** demo faces are AI-generated people, and sample looks show cached results. On-face color is a simulation, not a real swatch.
